

Insider Threat Webinar Agenda

September 30, 2020 | 8:00 am to 12:00 pm

Opening Comments	Bhesh Krishnappa (RF) will kick off the event and explain its focus on creating awareness on Insider Threats as a risk to the electric utility industry.
Insider Threat Trends in the Energy Sector	Dan Costa (Carnegie Mellon/Software Engineering Institute) will lead a discussion on findings from the SEI CERT body of work regarding the most prevalent Insider Threats to the energy sector. He will detail how different incident patterns tend to evolve over time, what vulnerabilities existed within victim organizations that enabled insiders to carry out their attacks, and strategies organizations can use to reduce insider risks to acceptable levels.
Insider Threat – A Case Study	Matt Shultz (FERC) will present a case study relevant to our industry and describe resources available to mitigate and report Insider Threats.
Insider Threat Awareness	Benjamin Gibson (NERC/E-ISAC) will provide information to help attendees familiarize themselves with the subject of Insider Threat and provide guidance on what to do if you suspect that something is not right within your organization.
Developing an Insider Threat Program: Who can you trust?	Steven McElwee (PJM) will lead a discussion on how building an Insider Threat Program – proactively or in response to an incident – can replace suspicion, confusion and uncertainty with trust. This case study will discuss four important areas of trust that are essential for building an Insider Threat Program.
Detecting and Defeating Advanced Cyber Security Threats	Chad Connell (MISO) will present information on how MISO is continuing to mature its ability to defend against inside threats and advanced external threats by combining a diverse set of skills, thinking offensively, and using a variety of technology and tools.
Insider Threat Program Maturity Framework	Bhesh Krishnappa (RF) will discuss the RF self-assessment methodology and an eventual tool that can assist users in evaluating the status of their Insider Threat Programs and benchmark performance over time.
Closing Comments	Ray Sefchik (RF) will wrap up the program with closing comments and what's next at RF.

Intended Audience

Those with a focus on risk management working in the areas of Cyber or Physical security, Human Resources and Legal, such as:

- HR Managers or administrators
- Physical security Managers
